

# Low-cost and Robust Global Time Synchronization

Marc Wyss, **Marc Frei** (marc.frei@inf.ethz.ch), Jonghoon Kwon, and Adrian Perrig  
Network Security Group, ETH Zürich

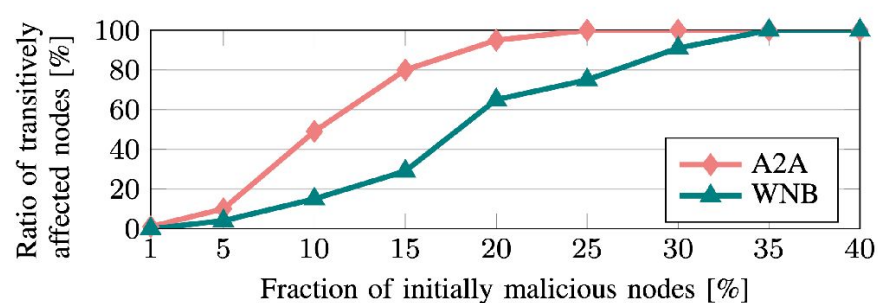

## Everdeen

**WNB**: stop fault propagation with neighbor-based synchronization.

### WNB Evaluation

WNB performs at least as well as A2A for the same proportion of initially malicious nodes.

### DOSC Evaluation

Linux-based router with offset measurements using chrony.
